THE BOARD OF DIRECTORS' STATEMENT, IN ACCORDANCE WITH CHAPTER 18 SECTION 4 OF THE SWEDISH COMPANIES ACT, REGARDING PROPOSED DISTRIBUTION OF PROFITS (SEK 2.00 PER SHARE)

Reasons for the proposal

The dividend policy of KappAhl AB means that the Board of Directors shall propose payment of dividends representing between 40 and 60 per cent of profits after tax, in each case, subject to KappAhl's capital requirements and with consideration to KappAhl's financial objectives and expected future earnings, future position, cash flows, terms of credit as well as other factors.

The Board of Directors considers the proposed dividend to be justifiable in view of what is stated below and the parameters stated in Chapter 17, Section 3, paragraphs 2 and 3 of the Swedish Companies Act (type of business, scope and risks and need for consolidation, liquidity and general position).

Type of business, scope and risks

The type and scope of the business and its risks are set out in the Articles of Association and the adopted Annual Report and Group Accounts. The business conducted does not give rise to any risks in addition to those that exist or can be presumed to exist within the business area or those risks generally applicable to business activities. Regarding significant events, reference is made to the statutory administration report, other financial reports and announced press releases. In addition thereto, there has been no occurrence of events that influence the Company's ability to pay dividends.

Consolidation needs, liquidity and position in other aspects

The financial position of the Company and the Group as of 31 August 2018 is stated in the Annual Report. The Annual Report also states those accounting principles applied in the valuation of assets, allocations and liabilities. The Group's Equity as of 31 August 2018 has been affected positively by approximately SEK 12 million by fair value of currency derivative.

It is the Board of Directors' assessment that full cover for restricted shareholders' equity will be maintained after the proposed dividend. The proposed dividend is not considered to have an impact on the ability of the Company or the Group to fulfil its payment commitments and its terms of credit, either over the short or over the long term. The Company and the Group are well prepared to deal with fluctuations in its continuous payment commitments. The Company's and the Group's financial situation does not give rise to any other assessment than the assessment that the Company and the Group may continue their operations and that the Company and the Group can be expected to fulfil their obligations in the short and

KappAhl

long term. The Board of Directors does not conclude that the proposed dividend jeopardizes the fulfilment of required investments.

Overall assessment

In light of the above, it is the Board of Directors' assessment that the size of the restricted shareholders' equity as for the Company and the Group, in relation to the proposed dividend, is well balanced in relation to the scope and nature of the business conducted in the Company and the Group and to the risks related thereto. The Board of Directors concludes that the proposed dividend is justified in relation to the Company's and the Group's need for consolidation, liquidity and general position.
